Q: Oracle: Generate column name from variable names? I need to change the column name in Oracle based on a variable and do this many times. In my case, it's a subquery that returns 2 columns, and I want to alter them. Query select column1, column2 from ( select a, b from table ) t; Alter Statement alter table t alter column t.column1 text; alter table t alter column t.column2 text; What I want to do is something like this. varCol=\$"column"+\$this.SelectedIndex.ToString()+\$this.Text alter table t alter column \$varCol text; I've tried a bunch of ways, but it's not working. A: Oracle doesn't support variables in column names. You'll need to dynamically build your query to include the column name, e.g. alter table t alter column (select t.column1, t.column2 from table t) txt; However, you will have to do something like this in Oracle to assign a1d647c40b

How to Advertise Your Little Business It's important to have a website in place for any type of business, including small ones. A website will showcase your products and services in a professional manner and make your business look more credible. The process of setting up a website can be time consuming, but it's one of the best tools you can use to start off your business. If you haven't started a website yet, or if you don't know how to, here are a few ways you can advertise your business to get it off the ground. Social Media Advertising Getting started with social media advertising can be difficult, but it's a great place to start. As a matter of fact, most people check out their social media accounts multiple times a day, so don't be afraid to advertise your business there. Twitter has become a great platform to advertise your business because people check it out multiple times a day. It's a great way to reach people on a daily basis and spread your business' message. The downside is that a lot of businesses use this platform as a tool to spam other people, so be aware that if you use it as a marketing tool, you need to be sure to manage it well and be honest. Blogging Starting a blog is one of the easiest ways to get started. It's a great way to get your business' message out there and spread your message. It's important to create a unique blog so you can catch people's eyes and keep them engaged. It's a great way to market your business, but it can also be a great way to get traffic to your website. However, you need to be aware that it takes time to build a following, so don't expect to make a lot of money within a short period of time. Just like anything else in life, it's important to have a plan and follow it. The key to success with your business is being honest and following through with the plan.
